

## ARTWORK INSTRUCTIONS

Our templates include cut and bleed marks to save you setup time and to ensure that the packaging design of your vinyl records meets our specifications. \*

All you have to do is place all the components of your artwork (images and text) in the templates and save the file. If you follow these rules, everything will go smoothly:

- Extend your artwork to the bleeding lines.
- Convert all texts into paths or send us also the source files.
- Hide the template lines in a separate layer before sending us your final artwork.
- All images must have a resolution of 300dpi or higher.
- Export your artwork in CMYK color mode (NOT in RGB mode, Lab).
- Color profile must be FOGRA 39.
- Upload your artwork files in PDF format.
- Keep in mind that the colors of your artwork will not look the same on a screen, in a digital print and in an offset print. The characteristics of different types of paper also affect the appearance of colors.

You can send us your files by uploading them to <https://press-play.wetransfer.com/>.

*\* Please use our templates to submit your final artwork.*
